Soybean Summit

Pushing the
Yields On Soybeans

January 19, 2009

Featuring
Kip Cullers
Champion Soybean
Grower from Missouri

Venue located at
VFW
301 S. State Street
Fairmont, MN 56031

Overview

For too long soybean production has languished while corn yields have made steady gains. Where do we go from here? The Soybean Summit is an introductory look at combining best practices and soybean-specific fertility recommendations to move beyond typical yields. How far can we go? The answer might surprise us all.

International Ag Labs is pleased to present a world-class panel of soybean specialists.

Classes

- ⇒ *Soil fertility and soybean health*
- ⇒ *Setting the stage for planning mid-season and late-season management*
- ⇒ *Soybean fertility based on the IAL soil test*
- ⇒ *Questions and Answers with panel of speakers*

Speakers

Kip Cullers

Kip Cullers is a champion soybean grower from Missouri. He's known for world record setting soybean yields. In 2006, Cullers set the world record for soybean yields when he harvested 139 bushels per acre in his contest fields. The next year, Cullers broke his own yield record by harvesting 154 bushels of soybeans per acre. Kip will be giving us a first hand look at how yields that were previously thought impossible are within our reach.

Mike McNeill

Dr. Michael McNeill was born and raised in Algona, Iowa. He received his B.S. degree in Agronomy from Iowa State University, he then later received his M.S. degree in Plant Physiology and Ph.D. in Statistical Genetics. Prior to developing a new company called Ag Advisory, Ltd., Mike worked as a Research Scientist and Research Director. Ag Advisory, Ltd. is an agricultural consulting company working with clients from Texas to Saskatchewan, Canada.

Bob Streit

Bob was born and raised on a farm in Mitchell County Iowa, graduated from ISU with a degree in Plant Pathology and Pest Management. He worked four years with ServiTech Inc. Bob then organized the agronomy services with a large co-op in central Iowa. He then worked 19 years with DeKalb and Cargill/Mycogen Seed Companies as a tech service agronomist. After multiple mergers he began working for farming clients as a consulting agronomist in Iowa. Until 2000 Bob also helped work and manage the home farm. In recent years he has been traveling to South America to study soybean rust and work with their pathologists on control methods. This has led him to work with the U.S. Rust Task Force and other projects with the USDA.

Dan Skow D.V.M.

Dr. Skow is a practicing veterinarian and partner of Fairmont Veterinary Clinic in Fairmont, Minnesota. Dr. Skow is also the founder and partner of International Ag Labs Inc., a lab devoted to carrying on the legacy of Dr. Reams' approach to soil fertility and crop growth. Dr. Skow is a long-time trainer in teaching Dr. Reams' methods.
