- 4:30 Q & A Session / Dismissal

# SPEAKERS

## Dr. Dan Skow

Dan Skow DVM, a practicing veterinarian, first met Dr. Reams in 1976. Dan studied the teachings of Dr. Reams for a number of years. They later teamed up to teach many agricultural courses together. During this time Dan became the leading agricultural student of Dr. Reams to carry the mantle to the next generation. Dan's close relationship with Dr. Reams lead to a new business for Dan that included soil testing, consultation, and product formulation. Dan continues to teach Dr. Reams method of agronomy thru classes and ongoing consultation.

## Wendell Owens

In order keep his business active, Dan contacted Wendell Owens, a longtime associate and local farmer to manage operations. Initially Wendell was a one-man wonder doing all the work of soil testing, phone consultation, and product sales. Soon the business was growing and needed proper facilities and more staff. At this point Wendell bought into the company and has continued to manage operations. Wendell makes most of the fertility recommendations for International Ag Labs. Wendell, along with his son-in-law, Kevin, farm over 300 acres and manage a beef herd. They farm about half the land organically and the other half biologically. Wendell brings many years of practical farming experience to the table as he makes fertility recommendations.

## Jon Frank

Jon Frank is a partner in International Ag Labs. Jon started the high brix garden program in 2005 as an undertaking of IAL. From that the program has expanded to market gardens and greenhouses. Jon's focus is on two primary areas; soil stewardship and health to the consumer eating the produce. Jon and his wife Rebecca have 5 children and live in Granada Minnesota within shouting distance from the Iowa border.

## Duane Headings

Duane Headings is a soil consultant with International Ag Labs. Duane has assiduously studied the teachings of Dr. Carey Reams and International Ag Labs for the past 4 years. Duane comes with a strong background in turf management, market gardens, greenhouse consulting, production agriculture, and backyard gardens. Duane recently started farming 2 acres of produce with half of it devoted to bramble fruit. Duane lives in Green Forest Arkansas with his wife Janet, and their 5 children.
